Summary

Computer Science student specializing in ML, currently training with DEPI (Digital Egypt Pioneers Initiative) on the ML track.
I work with Python and its libraries (Pandas, NumPy, Scikit-learn, Matplotlib) for applied AI/ML projects, alongside C++, Data Structures & Algorithms, and SQL for core problem-solving, and I'm continuously building my understanding of Deep Learning.
I'm passionate about solving real communication challenges facing the Deaf and mute community in Egypt, and I'm driven by continuous learning in a field that evolves every day.

Experience

Microsoft Machine Learning Trainee (DEPI), *Digital Egypt Pioneers Initiative* 07/2026 – 12/2026
Maadi,Egypt

- Training in advanced AI and Machine Learning tracks focused on practical industry applications.
- Building data analysis workflows and baseline ML models using Python, Pandas, and Scikit-learn.
- Applying core machine learning algorithms through hands-on projects and practical assignments.
- Collaborating with peers on real-world datasets to enhance problem-solving and model optimization skills.

AI Intern - National Research Centre (NRC) 08/2026 – 09/2026

- Completed an intensive introductory internship focused on Artificial Intelligence and Machine Learning fundamentals.
- Gained exposure to modern AI concepts, data-driven methodologies, and practical applications.
- Participated in hands-on sessions covering Python-based data processing and algorithmic problem-solving

Education

B.Sc. in Computer Science & Mathematics, Faculty of Science,Helwan University, 09/2024 – Present
Capital University (formerly Helwan University)

Skills

Programming Languages: C++, Python, SQL, C
Data Analysis & ML Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
Core Concepts: Data Structures, Algorithms, Object-Oriented Programming (OOP), Machine Learning, Computer Vision, Operating Systems Fundamentals, Database Management
Tools & Technologies: Linux OS Customization, Git/GitHub, VS Code, MySQL

Courses

Machine Learing & Intro. in Deep Learning, *CSilled Academy* 06/2026 – 12/2026

- Currently advancing expertise in foundational Machine Learning algorithms and introductory Deep Learning concepts.
- Gaining deep mathematical and practical understanding of model architectures and optimization techniques.
- Implementing hands-on machine learning workflows and neural network concepts using Python.

C++ & Software Engineering Foundations, *Programming Advices* 05/2025 – 10/2025

- Mastered C++ programming, Object-Oriented Programming (OOP), Data Structures, and Algorithms fundamentals.
- Applied analytical problem-solving techniques to construct efficient software modules

Projects

Egyptian Sign Language Recognition System 09/2026 – Present

- Designing and developing a real-time computer vision system to translate Egyptian Sign Language (ESL) gestures into text/speech.
- Implementing hand tracking and gesture detection pipelines using camera feeds to assist deaf and hard-of-hearing communities.
- Utilizing Python and deep learning frameworks for gesture classification and real-time model evaluation.

CoreOS, *Mini Linux Distribution* 04/2025 – 05/2025

- Built and configured a lightweight, custom Linux OS distribution as part of hands-on Operating Systems coursework.
- Handled core OS configurations, shell integration, and system-level utility setup to optimize resource usage.
